AM 204 – Asset Management Enablers

Overview

AM 204 introduces ways to engage with and manage the components needed to enable successful asset management.

Learners will understand the benefit of Asset Management:

- People
- Data and Information
- Information Systems and Tools
- Processes
- Service Delivery Models
- Audit and improvement

The course materials are based on the authoritative resources International Infrastructure Management Manual (IIMM) and Asset Management Basics.

On completion, learners are awarded a digital badge which can be saved and shared.

Who should attend

- Those who are new to managing infrastructure assets or those who want to align their understanding of asset management with the IIMM
- Students or recent graduates in any profession who are interested in this area.

Typical attendees include

- Consultants
- Planners
- Strategy staff
- Project managers
- Executives

Learning material

- Text, images, video
- Formative assessment
- Activities
- Case studies
- Summative assessment
