

Three Waters Collaboration

Ways of Working Project

Cathy Davidson
Orapai Woon

What was our “Ways of Working” Project

A COLLABORATION

**USING A SHARED
TECHNOLOGY
PLATFORM**

**SHARED WAYS OF
WORKING**

**ASSET MANAGEMENT AND
WORK ORDER
MANAGEMENT**

**ACROSS THREE
COUNCILS**

**ONE CONTRACTOR
(OWNER)**

Key Drivers (Why)

- TCC and WBOPDC formed a new collaborative contract for delivery of their 3 Waters Maintenance Contract
- 10 year contract (NZS 3917) – overall value of contract \$160 million
- (5 years, + 1, + 1, + 1 + 1 + 1)
- Seeking to transform to a common way of working
- Needed a common digital platform for work order and data management
- WBOPDC had bespoke system (retiring)
- Two Options: (1) invest in TCC systems (2) future proof through Watercare option
- Three Waters Reform on the horizon

Benefits Sought

Three Waters Collaboration

Cross-council Waters teams breaking traditional boundaries to deliver a New Zealand first!

- 01.** Raising people capability for a future-fit Waters business
- 02.** Building resilience to meet all challenges in the region
- 03.** Delivering on a consistent, quality customer experience
- 04.** Setting an exemplar standard for Water Reform

1. Raising people capability for a future-fit 3 Waters business

A larger contract provides greater career pathways for all people on all sides of the contract. The collaboration aspects of the contract mean that we can learn from each other, grow together and get better together across the region

2. Building resilience to meet all challenges on the region

By having a larger contract more qualified work force will be in a better position to cope with extreme environmental events and other challenges that are being presented across our industry including an ageing workforce and retention of skilled staff

3. Delivering on a consistent, quality customer experience

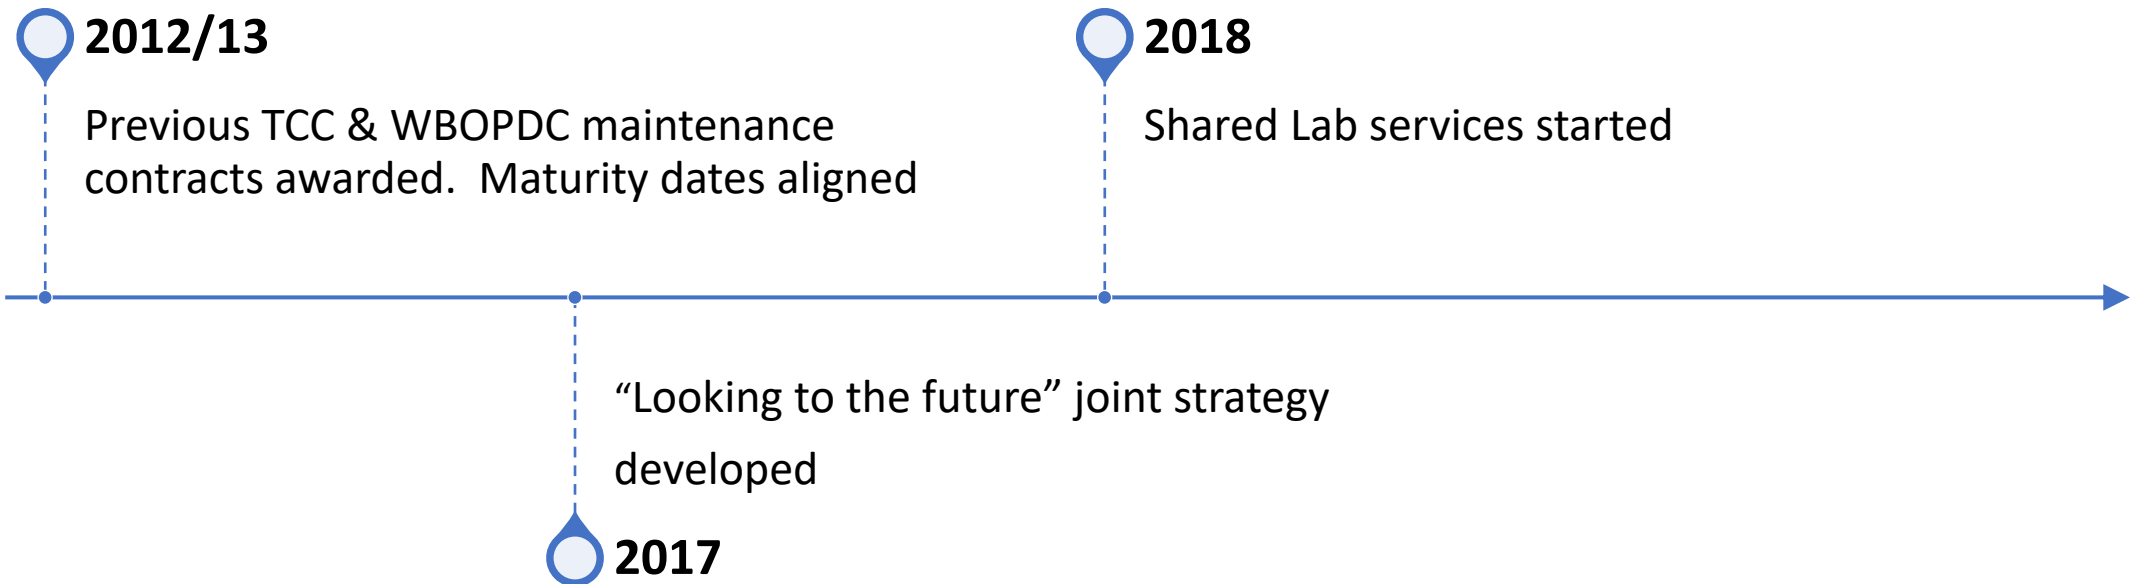

Ensuring that our population of over 200k residents receive that same great delivery of services regardless of where they are located.

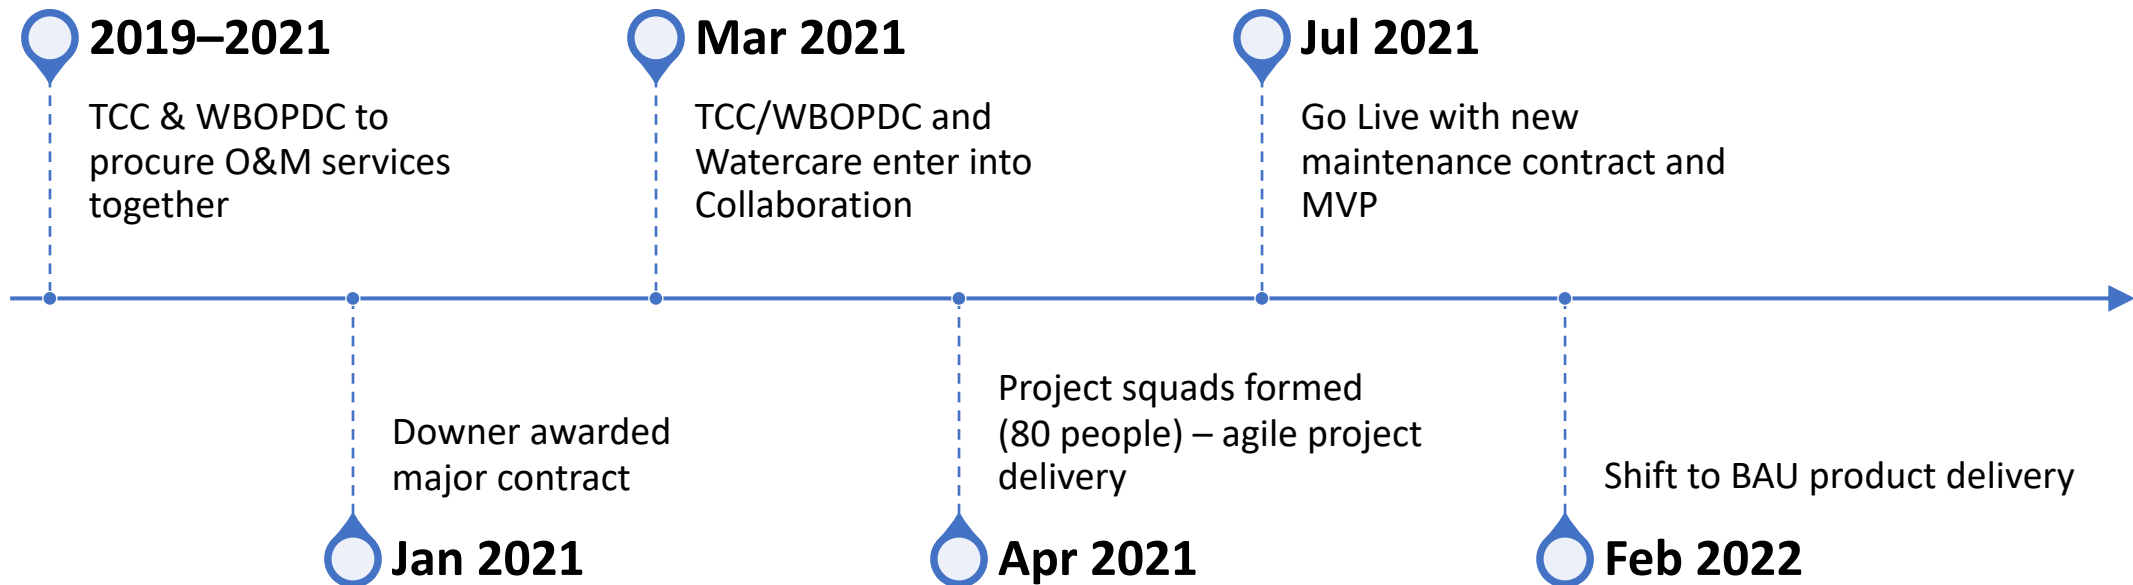

4. Setting an exemplar standard for Water Reforms

An opportunity to show New Zealand, the Bay of Plenty way of getting stuck in and working together to achieve great outcomes for our communities and the industry as a whole.

Timeline

Timeline

Agile Working Principles

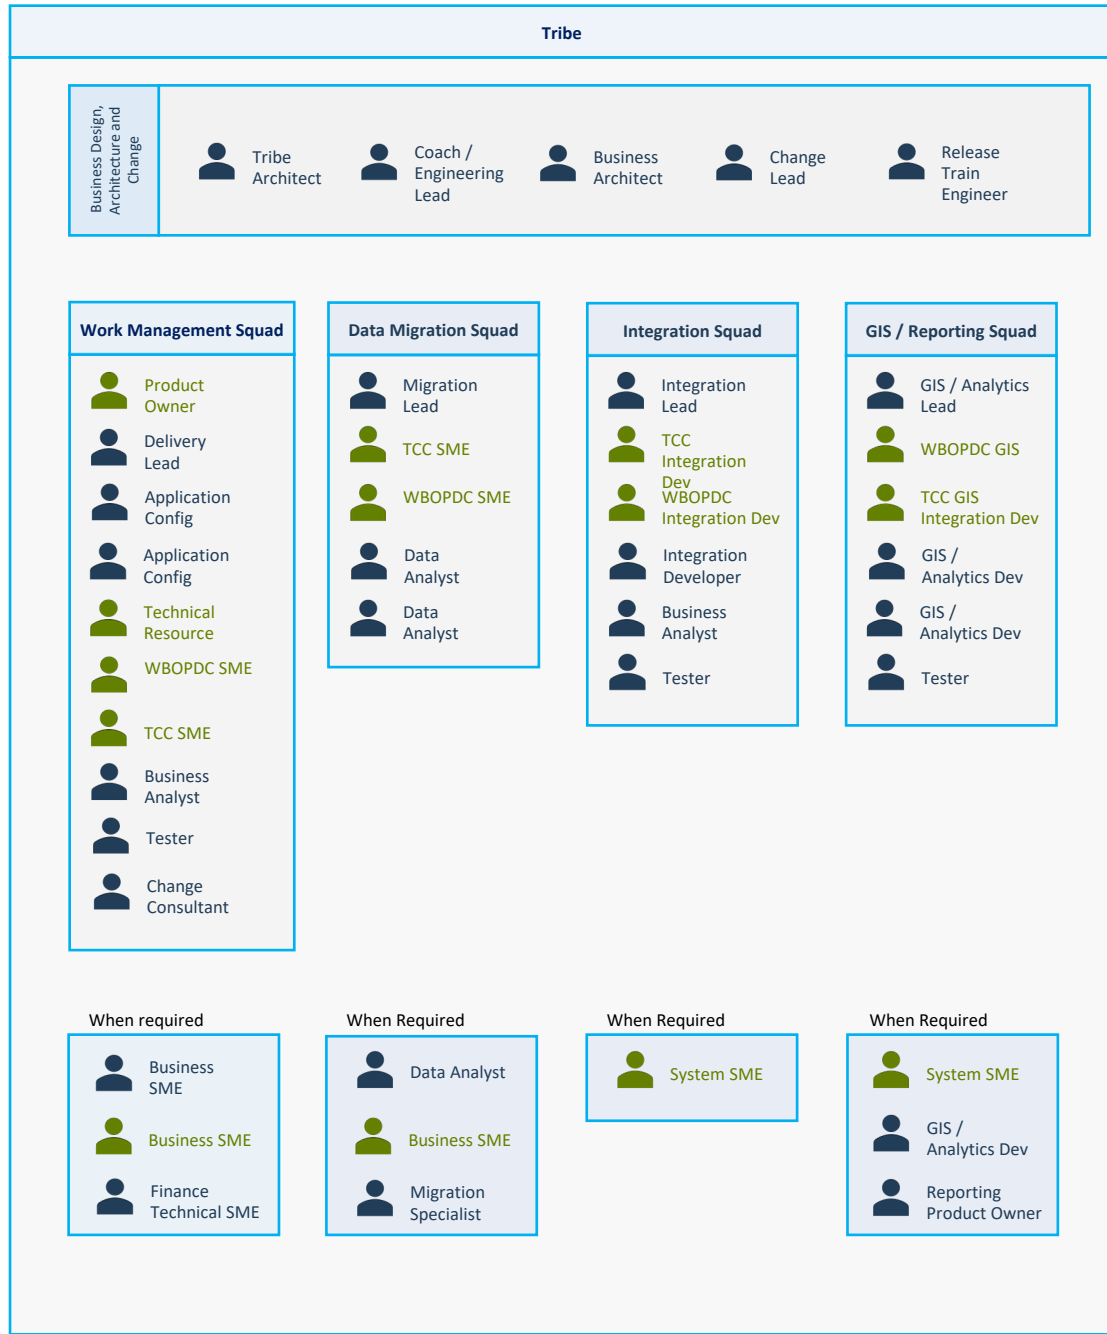

Customer Satisfaction The customer is central to what we do

Quality We focus on quality of output that meets our customers' needs

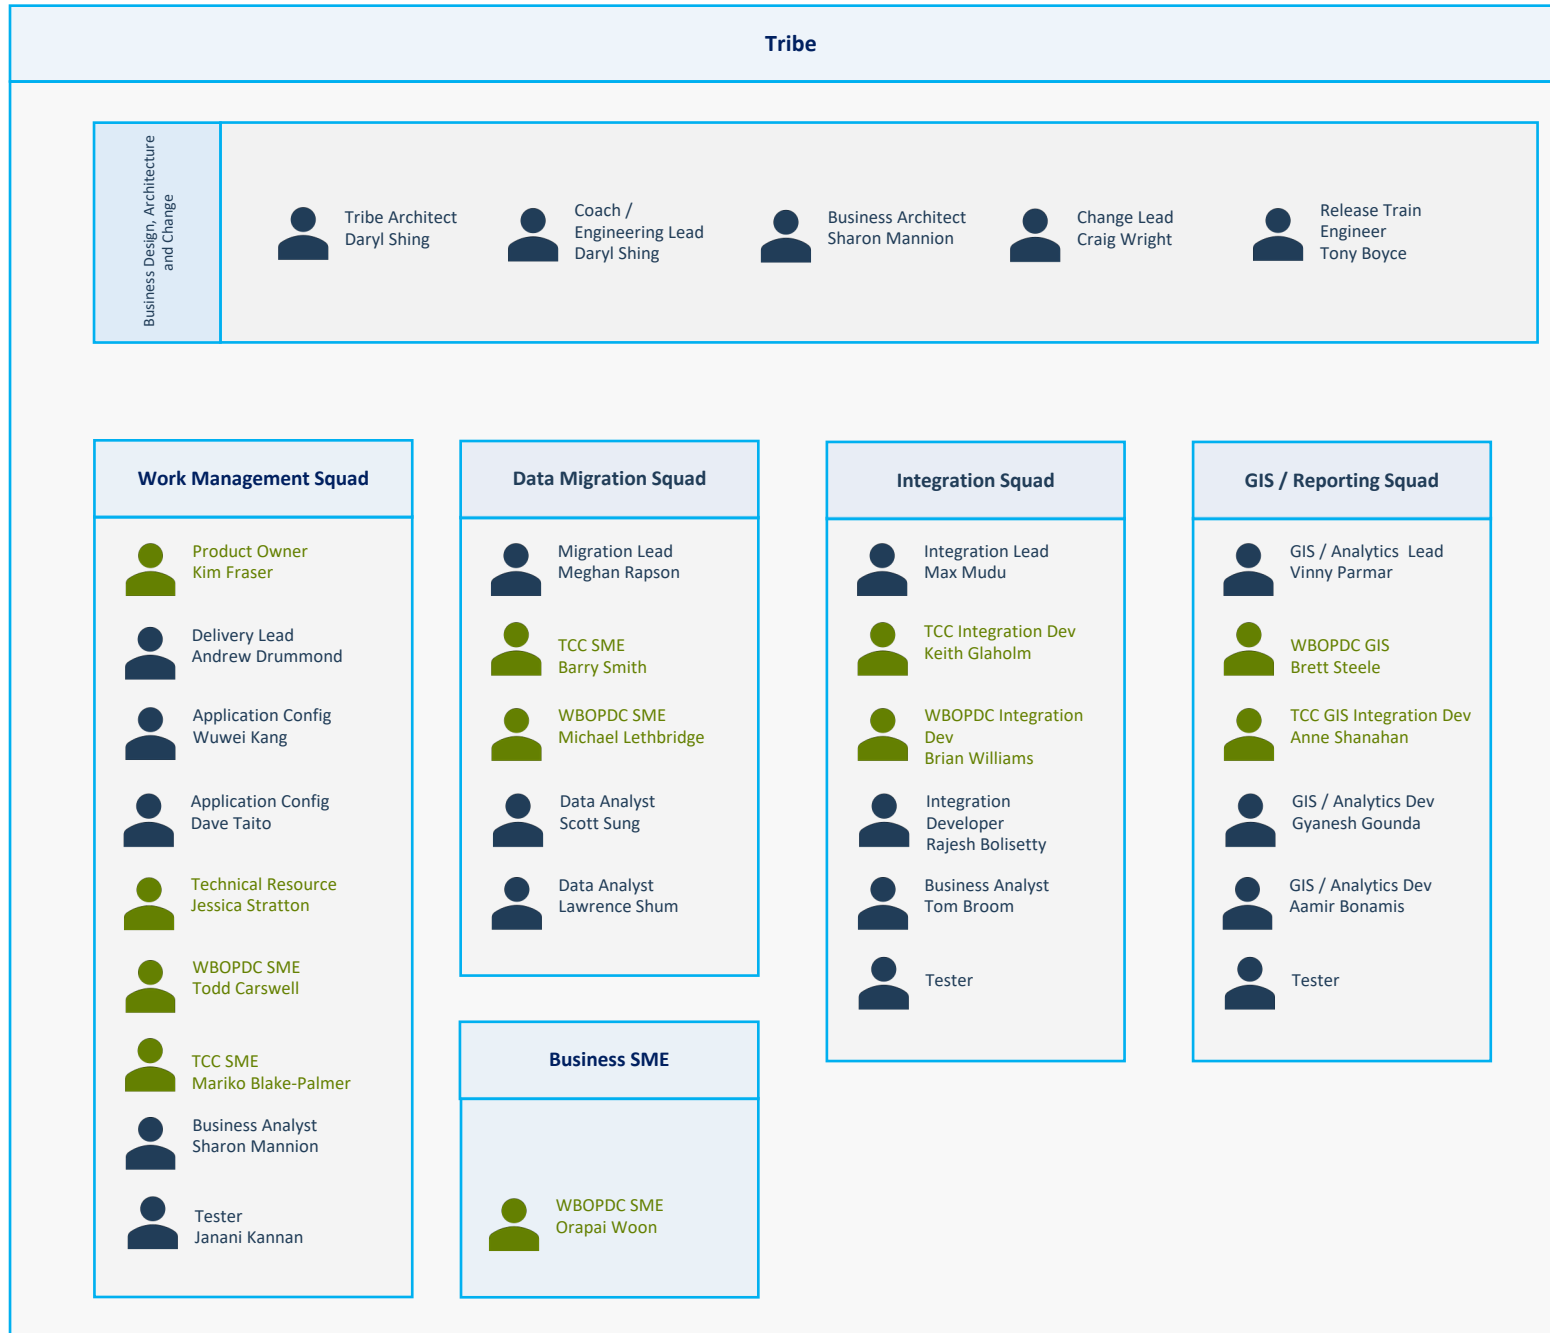

Teamwork We work collaboratively to achieve everything in a sustainable way

Project Mgmt We manage our time well – slow down to go fast

Delivery Structure

Multiple Work Squads

Tribe support team is responsible for supporting the squads and removing impediments. Provide coaching to help the squads continue to improve and share learnings.

A Tribe contains a set of squads focused on delivering business value to the business. This encourages squads to collaborate around a common set of business drivers. Typically there is one tribe per value stream.

Squads

- Self organising multi-skilled team with 4 – 9 members
- Set up to run long term and own the process and quality of the product
- The squad is assembled on the principle that they have all the skills required to perform the backlog items assigned with no / limited handoffs
- Squads can be a combination of organisation members
- The product owner should be from the business and have in-depth business knowledge and is empowered to make business decisions quickly

KEY

Watercare

TCC or WBOPDC

Leadership to Support Project

Big Room Planning

- 18 'capabilities'
- Modelled on Watercare's transformation journey

C1 – Asset Migration

Assess, Cleanse and Load assets from the TCC and WBOPDC systems

Team Lead: Meghan Rapson

Scope for July 1st	Candidate scope for Cycle 2
Design & Configure the stormwater asset hierarchy and attributes	Water Meter asset loads – (Timing TBC).
Cleanse and load all 3 water assets access (Network, Facility/Plant, Stormwater) TCC/WBOPDC into Watercare systems	Delta load of June 2 nd to 1 st July 2021 – (Timing TBC)
Reconciliation/Audit report of asset migration	(TBC) Any data remediation activities? (Bundled into Hypercare)

Key business changes / impacts
All waters asset maintenance data updates must occur in the new systems.
TCC data warehouse waters & Accela/AssetFinda info will become stale and won't be updated.

C2 – Establish GIS Platform

Assess, Cleanse and Load assets from the TCC and WBOPDC systems

Team Lead: Vinny Parmar

Scope for July 1st	Candidate scope for Cycle 2
Standup and configure an enterprise ArcGIS instance for use by TCC/WBOPDC.	Delta loads for addresses from WBOPDC / TCC.
Extract and load asset locations	Move to Utility Network (still to be finalised)
Extract and load addresses from WBOPDC / TCC	Support for loading key customer data against water meters and automation of the load to GIS
Load of key customer data directly into GIS	Report for key customer data (short term GIS extract / long term Birst report)
	Datum Updates

Key Risk
All Segmentation workflows, formulas and integration must be in place prior to loading of data – UAT and PROD.
Stormwater workflow to be loaded to UAT and PROD
Clarity of who / how assets are created for all roles

Key business changes / impacts	Key Risk
All users that need to update geospatial water information must use the Watercare geospatial systems.	Requires guest account access in Watercare's AAD to be resolved (UPN verse Email Address)
WBOPDC / TCC will need to log into a server in Watercare Azure to use	

C4 – Asset Information

A TCC / WBOPDC Staff Member or External Contractor can see or receive details of assets

Team Lead: Kim Fraser

Scope for July 1st
Downers can retrieve all asset information via a nightly batch file

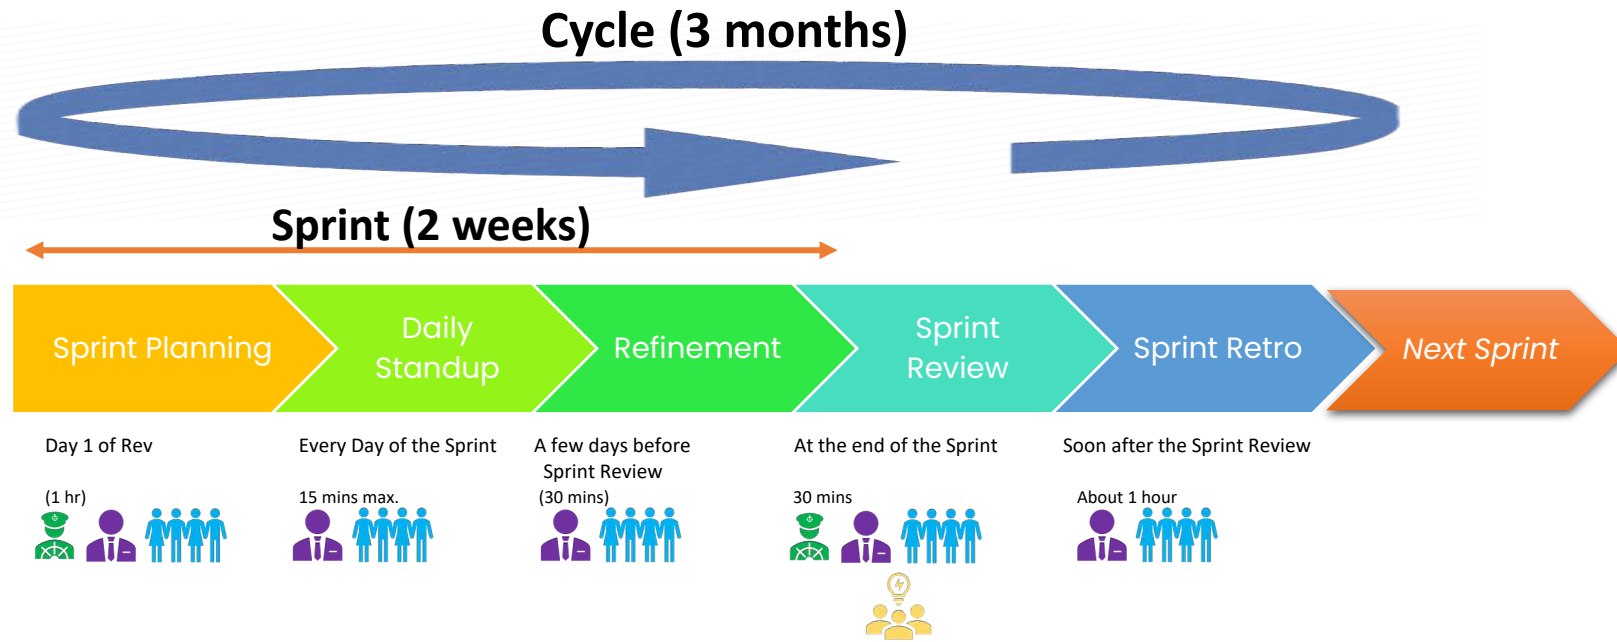

Candidate scope for Cycle 2
TCC / WBOPDC Staff Member or External Contractor can access as built documentation for assets via the GIS viewer. URL Links to Infor IDM and Council(s) Objective depending on source process for as-builts.
Storage of as-built & digital inspection documents associated with a WO stored in Infor IDM.
Store a copy of Accela & AssetFinda data into WC Waterlake.
Historical Work Orders
Condition Assessments
Migrate asset document links
Power plan failure data

Key business changes / impacts

Key Risk
IDM Document segmentation needs to be addressed (confirm the document size limit)

Agile Cycle

KEY

- Product Owner
- Squad Lead
- Stakeholders
- Squad

**For the Squad, each sprint starts on a Wednesday and ends on a Monday
Tuesday's are for ceremonies**

Change Management

User Centric

- Introduced a change mgmt. framework
- Detailed stakeholder plan
- Multiple communication options
- Impact analysis - honest feedback
- Readiness assessments
- Capability assessments

Channels Used Building Relationships

- Co-location
- Intranet(s)
- Big Room Planning
- Sprint Reviews / Showcases
- “Download” issues
- After work - beersies

Regular Updates

Three Waters Collaboration – News Update

21 May 2021 **In this update:**

What is the 3 Waters Collaboration Programme?

Agile Ways of Working

Delivery efforts so far

What's happening in the coming weeks?

Who to talk to about these changes?

What is the 3 Waters Collaboration programme?

The 3 Waters Collaboration programme is really all about the common goals of TCC and WBOPDC to deliver long term, sustainable and consistent outcomes for teams involved in the delivery of services for water and the customers who they support.

From July 1, 2021, a joint maintenance contact with Downer across the two regions will take effect. New systems and processes are being developed in partnership with Watercare to support it.

[Back to top](#)

What's happening in the coming weeks?

It's going to be a busy one.

The delivery squads will continue to develop functionality and the wider team will start to focus on business readiness activities in preparation for the upcoming changes.

A couple of key dates that you might be interested in include a 'mid-cycle showcase' on Thursday 27th May, and timing for finalisation of scope on Tuesday 1st June.

Thursday 27 May – Mid cycle showcase, 9.30am to 11am, University of Waikato – Tauranga – Room 3.03.

Showcases are open to everyone at TCC and WBOPDC and we would love to see you there, even if you're just interested in what's going on. The primary purpose of a Showcase is to demonstrate the value the work is delivering to the business. This often includes working technology demonstrations and guest speaking slots.

Tuesday 1 June – Scope for 1 July finalised.

This is a key milestone when we can confidently validate business impacts and the subsequent plans that have been put in place to deliver the 1 July changes. Teams can expect to see more targeted messaging from this date.

[Back to top](#)

Who to talk to about the changes?

With approximately 40 employees from TCC, WBOPDC & Watercare actively involved in the 3 Waters Collaboration programme there are plenty of people that you can reach out to if you have any questions.

If you're unsure about who the people are that are representing your area, please get in touch with either Cathy, Kim, Marion or Chris.

TCC
Cathy Davidson (3 Waters Collaboration programme business owner) or Kim Fraser (3 Waters Collaboration programme Product Owner)

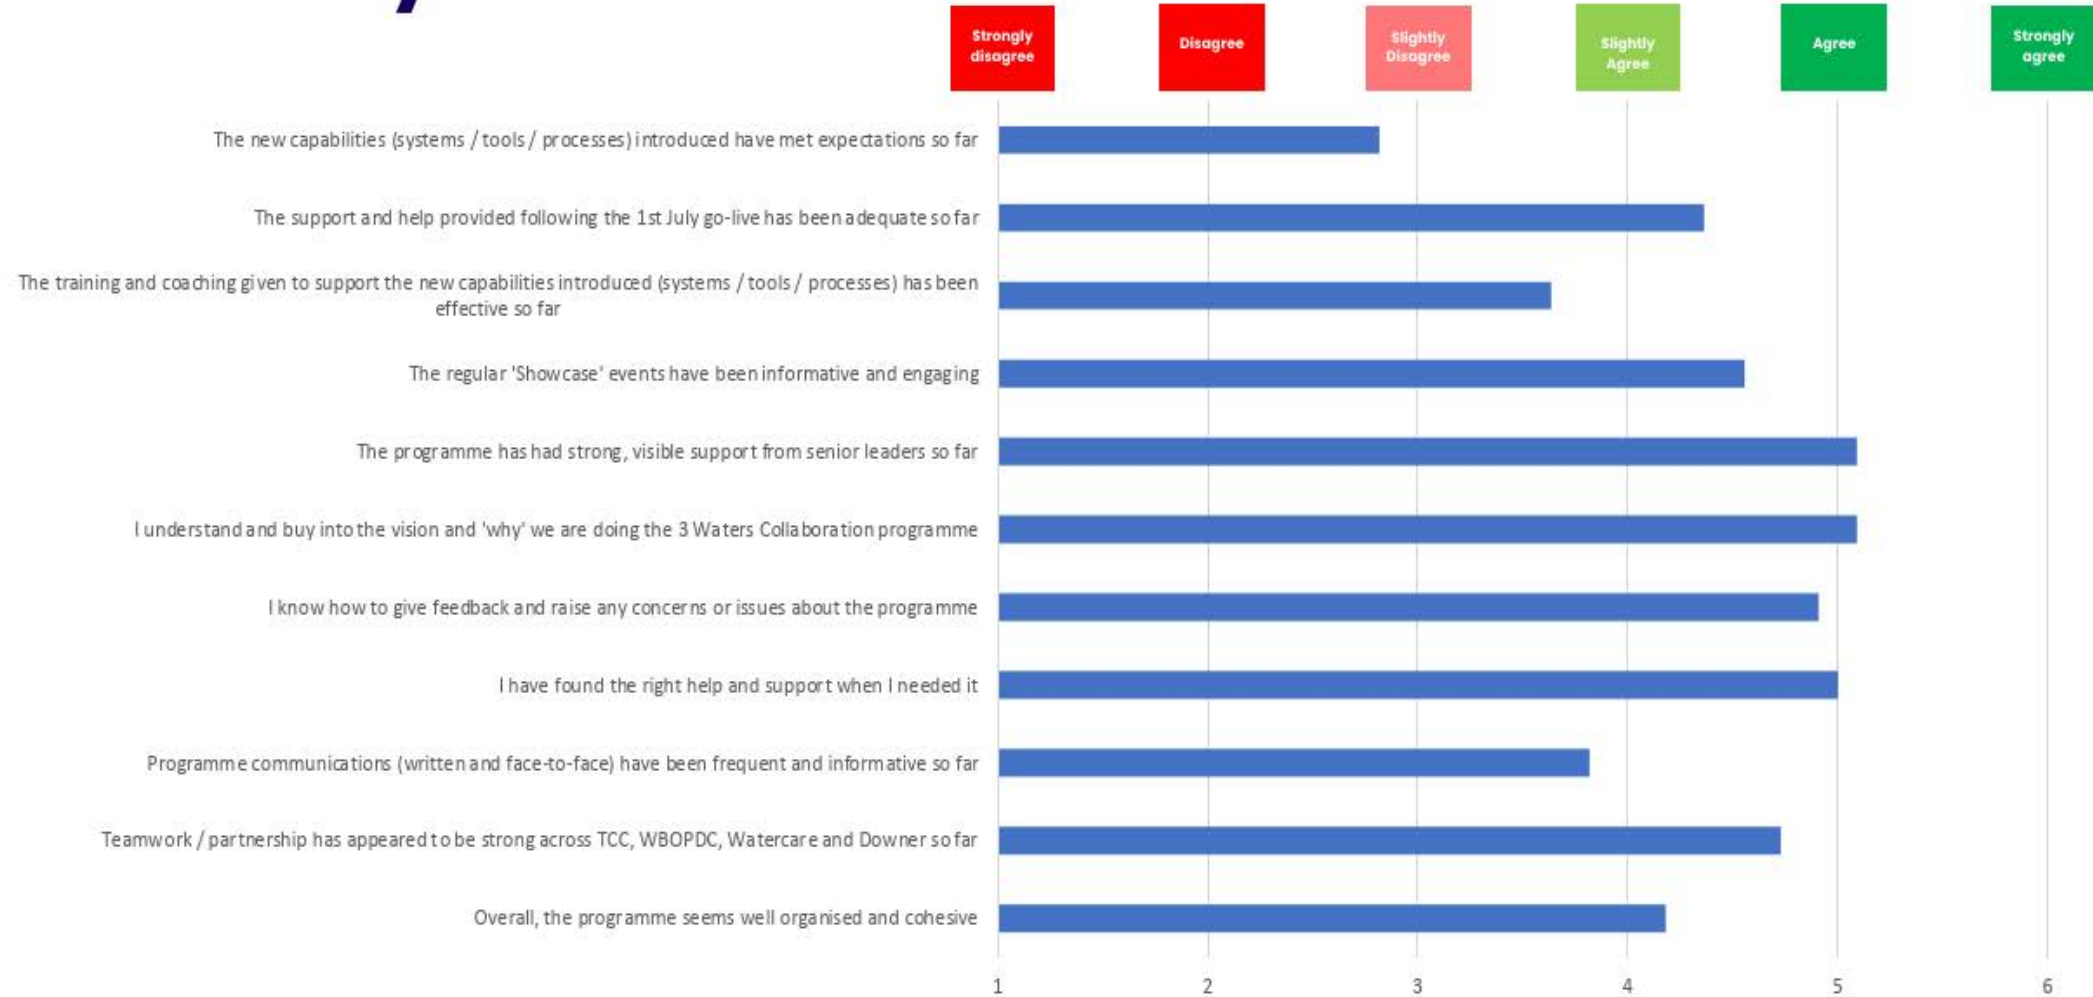

WBOP
Marion Dowd (Western Bay programme executive lead) or Chris Shaw (Western Bay programme support)

Summary chart.

Putting the systems together

Data lakes, analytics, working smarter and with more agility

- Work Management & Asset Management
- GIS
- Reporting, Insights and Analytics
- Data Migration
- Integration to CRM and contractor systems

Key Challenges

- Resource (getting the right people)
- Data Migration - 643,000 assets, and 80,000 water meters
- Mixed Project – Technology as well as business processes
- Working across multiple organisations
- Managing the change
- Key leader in WBOPDC departed
- Time – Hard and fast go live date - Developed hypercare support

Innovation

- Collaboration – 3WC Project
- Contractor treated like a partner
- Co-location
- Future proofing services - scale operations
- Share staff
- Introduced new ways of working “agile”
- Improving staff knowledge and capability in systems and process
- Shared Product Owner role (embedded into BAU role)
- Agreed shared metadata standards and processes

Successes

COST SAVINGS

EFFICIENCY

IMPROVED
CUSTOMER SERVICE

COLLABORATION

Key Learnings

- Agile methodology – works
- Collaboration - works
- Having a common goal - works
- Relationships count
- Change management – never underestimate it
- Technology is the enabler
- Look to your business for the experts
- Data is king

Nearly a year down the track

- Move into BAU for 3 waters work order and asset management
- Participate jointly with Watercare in BRP “big room planning”
- Contributed to 3 Waters NTU investigations of systems
- Training of users still in progress
- Data attributes – further migration
- Bedding in of support processes with Watercare
- Analytical reporting (parts) a work in progress
- New governance structure in place to support BAU
