AM 430

AM 430 – EFFECTIVE ASSET MANAGEMENT PLANS

AM 430 – Effective Asset Management Plans is a practical how-to for writing and updating an Asset Management Plan.

It covers each topic of the Asset Management Plan (AMP) in turn – what is needed, links to other sections of the plan, good practice examples, and how these might relate to different situations.

By the end of the course you will be able to:

1. Write, review and/or update effective AMPs

2. Demonstrate understanding of the key topics included in an Asset Management Plan

3. Develop efficient AMP updating processes.

This course will give you a deeper understanding of asset management plans so you are equipped to write/update your own.
